

Phase 1 (August 2000) was a prestigious project in the Further Education sector including a new hospitality building with training kitchens, hairdressing, beauty salon etc., together with a major refurbishment of an existing building to provide a 'one-stop shop' environment similar to the concept of a building society rather than the traditional College approach.

- 25,000 sq.ft. of new building accommodation
- 50,000 sq.ft. of refurbishment

The buildings were constructed in 2 phases to ensure the courses at the College could be maintained uninterrupted. A feature of the design was to harmonise the external appearance of the refurbishment block with the new build.

The project was successfully completed adopting both traditional Procurement and Partnering to meet the specific challenges of the individual elements.

Recently, mmbbl have undertaken feasibility studies for further refurbishment projects for the campus, including an eight storey tower block with learning resource centre.

MMBL also assisted the college with funding applications and prepared a five year planned maintenance programme for all college buildings.
